

Product Specification Sheet

Targus Ergonomic Dual LCD Display Arm

Part #: AWE33US

Product Description:

The Targus Ergonomic Dual LCD Display Arm provides users with an ergonomic solution by positioning up to two LCD monitors at eye level to help avoid strain while working. The height of the LCD arm is adjustable so a number of different users can change the height to suite their needs. The arm also pivots horizontally making it easy to adjust for visibility and comfort. To help keep your workspace organized, the Dual LCD Display Arms also include a cable management feature so your monitor cords are hidden and your desk is free from unnecessary clutter. The VESA compliant mounting plates meet international pre-defined mounting standards used by LCD manufacturers making the arm compatible with VESA compliant LCD monitors. The Dual LCD Display Arm supports two LCD monitors that weight up to 13 lbs. each. Easy to install, LCD arms can be mounted through an existing hole in the desk or clamped to the side of the desk for added convenience. Ideal for home offices or corporate environments, the Targus LCD Monitor Arms allow you to create a comfortable, ergonomic workspace to help increase productivity.
